paper, load one extra sheet of the same photo correctly, paper in the paper tray. An extra sheet has been included in the paper tray. An extra sheet of the same photo correctly, paper and other print media on page 11.) Make sure the
paper is loaded correctly in the paper tray. Remove all the paper from the tray and fan the stack of paper well, then put it back in the tray. Printing Received Faxes Difficulty Suggestions Condensed print Usually this is caused by a poor telephone connection. Make a copy; if your copy looks good, you probably had a bad connection, with static or
interference on the Horizontal streaks telephone line. If your Brother machine shares a line with other telephones and you want it to automatically receive faxes and produce a fast double-ring to alert you to answer voice calls. Set your Brother
machine's Receive Mode to External TAD. (See Choose the Receive Mode on page 27.) Make sure your Brother machine's Fax Detect feature is set to On. Fax Detect is a feature that allows you to receive a fax even if you have answered the call on an external or extension telephone. For example:
service and its signal comes through the line while your machine is sending or receiving a fax, the signal can temporarily interrupt the faxes. Brother's ECM (Error Correction Mode) feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a
single, shared line with custom features. Scanning Difficulty Suggestions TWAIN or WIA errors appear when Make sure the Brother TWAIN or WIA driver is chosen as the primary source in your scanning application. For example, in Nuance 12SE, click starting to scan. (Windows Scan Settings, Select to choose the Brother
TWAIN/WIA driver. Page 99 It is necessary to set the third-party Security/Firewall Software to allow PC-FAX Rx. In Port number: Enter 54926. Press Stop/Exit. problem on your telephone line, you may prefer to
use it only when needed. To improve compatibility with most VoIP services, Brother recommends changing the compatibility settings to the factory appear on the
LCD. default. Press Stop/Exit. Brother strongly recommends performing this procedure before handing over or disposing of the machine. How to reset the machine Press of the choose the type of reset (Machine Reset, Network, Address&Fax or All
